

Daetherium By Dae Platform

Introduction

What is Daethereum?

Daethereum is a cryptocurrency or digital asset that is only available in the digital world, Daethereum designed without relying on a central server.

It is nearly identical to Ethereum, since it is created based on Ethereum Platform.

Transfer instant

You can easily send Daethereum anywhere in this entire world in seconds as long as it is connected to the internet.

Daethereum transactions are Anonymous

All transactions that have been done is recorded and displayed in blockchain. Although you can set your identity anonymous, all your transaction is still able to be monitored via Ethereum blockchain explorer.

The number of tokens limited

There will only be 100 million Daethereum worldwide. This resembles an economic system based on deflation and increasing supply token. Daethereum prices will rise as demand grows and the number of coin remains.

Why Daethereum?

1. After completion of the Initial Token Sale, Daethereum (DTHR) will be delivered to your ethereum address.
2. After completion of the Initial Token Sale, Daethereum (DTHR) may trading at EtherDelta and ForkDelta.
3. Daethereum (DTHR) to build Dae Platform project plan: Tokenization, Travel Comparison Ticket Price, Media Information, Dae Platform Markets, Development Plans.
4. Have experienced team in their field.

Spesification
